LA Carnival Arts in Education

Los Angeles Carnival

LA CARNIVAL ARTS IN EDUCATION™

OUTCOMES

After their residency students will:

- Understand use of critical thinking, mathematics, design, writing and art in nurturing their creativity.
- Be exposed to world history and cultural geography.
- Be able to use geometric and organic shapes to understand size, scale and proportion.
- Be able to source supplies and create a realistic project budget.
- Be able to take an idea from concept to design to presentation.
- Discover careers in the creative industries that use skills they developed during their residency.
- Enjoy the experience of team collaboration that results in a completed art project of their own.

LA CARNIVAL ARTS IN EDUCATION™

LA Carnival Arts in Education™ is an arts education program of creative residencies. It uses world traditions of festival and carnival arts to deliver standard-based instruction and hands-on experiences that explore common global traditions.

K-12 ARTS EDUCATION RESIDENCIES

The program is designed in residencies with modules for grades K-12. Each lesson incorporates the students own cultural knowledge while introducing them to values other than their own. Participants are supported to interpret the integrated information with experiential work in art, design, music, writing, mathematics, dance, performance and public presentation.

VENUES

Residencies are designed to take place in classrooms, parks, studios and other community venues. At the conclusion of each residency participants take part in a culminating activity in the Los Angeles Carnival and Festival of Arts.

PROGRAM IMPACT

This program provides cross-cultural arts experiences for students from socially underserved and culturally underexposed communities. Students learn skills across a wide spectrum of disciplines while they explore their creativity and learn about different cultural values. Participants are also introduced to opportunities to enhance their skills with options of pursuing careers in the creative industries.
